FernGully: The Last Rainforest

1. What biome does the setting of this movie take place in? How do you know? (Give animal and plant evidence to support your answer. Example biomes are freshwater, marine, savanna, tropical rainforest, temperate rainforest, boreal forest, grassland, desert, and tundra)

2. Describe (in detail) the major problem Crysta, Pips, Batty, & Beetle Boys face with their environment. Where does this environmental destruction come from?

3. Create a food web of the animals and plants seen in the movie (at least 6 organisms involved and label their trophic level).

4. What is the monster eating trees? What really do the red Xs mean?

5. You do not currently drive a monster eating the trees but your actions do contribute to people needing to do that job. What actions do you take in your life that contribute to deforestation?

6. More than 5,000 products come from trees. Trees not only provide oxygen, wood and paper, but other less obvious forest products such as chemicals that are important ingredients in toothpaste, shoe polish, medicines and cosmetics. Come up with a strategy that allows trees to be used for products in an environmentally friendly way.
